CQS Release 11.1 — Review Findings

Optimizing the Reporting Process

DiCOM Software is proud to announce the release of our latest version of CQS focused on revolutionizing the reporting and distribution of loan review findings. Based on DiCOM's last market study, most loan review professionals indicate reporting of review findings as their single biggest challenge. CQS users now have some major relief in this critical area of the loan review process.

The Loan Review process made easy, efficient, and measurable!

DiCOM understands that credit risk professionals are under pressure to “say more with less”. To that end, CQS 11.1 offers reporting features that combine power and flexibility with improved ease of use.

“With the new reporting capabilities, my loan review team can now focus on reviewing loans, hereby increasing our portfolio coverage”
